

Finders - Keepers? How to access and sustain patients and the public for involvement in research (mixed experience)

Half day workshop

Who the workshop is for

Beginners and experienced (people who are new to and people who have some experience in the active involvement of patients and the public in research).

What the workshop covers

The first part of the workshop looks at how to find patients, carers and members of the public who might get actively involved with your research (bring your tablets and smartphones for some online searches).

The second part of the workshop will explore how you can sustain this involvement throughout your research study. We'll look specifically at involvement in lay panels but this workshop is suitable for researchers considering any type of involvement.
